Equity Research Analyst Internship

The Equity Research Analyst Summer Interns work closely with Fidelity’s portfolio managers and play a vital role in contributing to the investment performance of the firm. The interns are assigned a group of stocks within a specific industry to analyze. This analysis involves interviewing company management, communicating with external research sources, assessing customers and suppliers, competitors of companies, compiling detailed financial models and projections, and applying economic and industry analysis to produce an investment recommendation. The interns will have sole responsibility for coverage of the assigned companies for the duration of the internship.

The culmination of the internship is the completion of a written Industry Review that will be presented at the end of the program. The challenge for the summer interns is to become an “expert” in the assigned industry and to convince portfolio managers to implement his/her recommendations into their funds.

Summer 2021 Program Details

From a former Equity Research Analyst Intern...

Julia Pei
The Wharton School, Class of 2018

“The equity research analyst internship was an incredibly fulfilling experience in how closely it emulated the full-time job. It was so rewarding to interact with our various PMs and ultimately drive ownership changes for our shareholders based on my work!”
