Pharmacy Residency Programs

ACCREDITED PROGRAMS

PGY-1 Managed Care Residency: Texas & Pennsylvania

These programs have been developed to provide pharmacists with a holistic view of the pharmacy, including clinically-based experiences within the managed care environment.

Upon completion of this residency, pharmacists will:
- Be competent and confident practitioners in a dynamic pharmacy benefits management (PBM) environment
- Understand the role of a pharmacist and individual departments within PBM
- Gain a clinical and administrative perspective in the management of pharmacy benefit plans for a wide variety of clients

PGY-1 Pharmacy Practice Residency

Coram® is a national provider of specialty home infusion services and specialty pharmacy distribution with more than 70 branch locations across the country. Coram’s nurses, pharmacists, dietitians and other clinical staff are known in the industry for providing an exceptional level of care to thousands of home and infusion suite IV patients every day, including those with complex therapy needs.

What to expect from the residency program:
- Opportunities to attend and present at regional and national professional meetings
- Residency pharmacy projects that are both site-specific and nationally focused
- Preceptorship from leading experts in specialty home infusion and pharmacy practice
- Learning experiences that focus on multidisciplinary care coordination approach for patient assessment, care planning, monitoring, education and medication reconciliation

PGY-1 Cedars Sinai-CVS Health Pharmacy Practice Residency

This program provides comprehensive pharmacy practice training experience in both an ambulatory care and a retail setting through our disease prevention and management programs, including Anticoagulation, Diabetes, Hypertension, Dyslipidemia, and Travel Medicine.

The residency provides opportunities to learn about population health management, community pharmacy and managed care. The goal of this residency is to develop a clinical pharmacist with comprehensive training in both an ambulatory care and a community pharmacy setting.

The Clinical Pharmacists Role Includes:
- Evaluating drug therapies
- Developing treatment plans
- Initiating, titrating, and discontinuing medications under protocol
- Educating patients enrolled in drug therapy management programs
- Analyzing the effectiveness of clinical services and reporting outcomes
- Analyzing health plan pharmacy data to minimize costs to consumers and health plans
- Participation in the Pharmacy and Therapeutics Committee to ensure safe and effective use of medications
- Training pharmacy students
- Ensuring patients are adherent on their medications

PGY-1 CVS Health Aetna Medicaid Managed Care Residency

The Managed Care residency at CVS Health-Aetna Medicaid will develop post-graduate pharmacists for leadership, clinical and operational roles in managed care. These roles include:
- Prior authorization pharmacist
- Medication therapy management (MTM) pharmacist
- Health plan pharmacy manager/director
- Drug information pharmacist
- Utilization management pharmacist
- Formulary management pharmacist
- Quality improvement pharmacist.

Educational Outcomes
- Patient care
- Advancing practice and improving patient care
- Leadership and management
- Teaching, education, and dissemination of knowledge

PGY-1 Community Pharmacy Residency — Long-Term Care: Ohio

The Long-Term Care Pharmacy Residency will expose pharmacists to clinical practice, patient-centered care, innovation and organizational leadership. Partnered with University of Toledo College of Pharmacy and Pharmaceutical Sciences, this 12-month intensive program is designed for the resident to learn the different facets of long-term care through experiences in patient care, dispensing, practice management, teaching, research and public health.

PGY-1 Managed Care Residency, Specialty Innovation: Rhode Island

The CVS Health Specialty Innovation Residency program provides an exciting opportunity to work with a premier specialty pharmacy provider, while increasing knowledge of specialty pharmacy practices. The resident will interact with a multitude of internal areas, including clinical development, performance management and training, pharmacy operations, analytics and outcomes, marketing and sales, and strategy development.

Specialty Pharmacy Residency

The CVS Health Specialty Pharmacy Residency program provides a unique opportunity to work with a premier specialty pharmacy provider, while increasing their knowledge of specialty pharmacy practices. The resident will gain:
- Preceptorship from leading experts in specialty home infusion and pharmacy practice
- Learning experiences that focus on a multidisciplinary care coordination approach for patient assessment, care planning, monitoring, education and medication reconciliation
- Clinical competency in all therapies administered in the home setting including antibiotics, cardiac support, pain management and specialty medications
- Opportunities to work directly with pharmacy students in the academic setting and obtain a teaching certificate (site-specific)
- Intense professional development
Pharmacy Fellowship Programs

Clinical Quality Evolution Fellowship

The Clinical Quality Evolution Fellowship program provides opportunities for pharmacist practitioners to identify risks and challenges in the community setting, as well as develop evidence-based solutions on a national level.

As a result, the fellow will:
• Gain a deep understanding of medication-use safety
• Be involved in clinical decision support, drug information, controlled substance dispensing and prescribing, and investigating quality-related events
• Master the skills required to lead multidisciplinary teams and function as an effective leader
• Identify and implement needed improvements in the present system and assess the change achieved
• Be highly skilled in evaluating systems and workflows for quality and safety gaps
